Sullair Expands Product Line to Include Centrifugal Compressors

Chicago – Sept. 15, 2015 – Sullair, an industry leader in innovative compressed air solutions since 1965, is pleased to announce centrifugal compressors are now available through Sullair distribution channels. Sullair and IHI, two industry experts, have been part of a joint venture since 2004 designing, producing and selling advanced centrifugal compressors. The line, branded Sullair powered by IHI, will be supported by key distributors throughout North, Central and South America.

“Our centrifugal compressor line allows us to expand into new markets and applications,” said Brian Tylistz, Vice President of Oil Free and OEM at Sullair. “Sullair is well known in the 5-600 hp rotary screw range. Now our centrifugal line gives us access to enhanced technology, allowing us to expand up to 30,000 hp.”

Sullair offers two families of centrifugal compressors: the T-series and f-series. T-series compressors come in complete packages, with models ranging from 168 to 2,306 hp producing flows from 553 to 11,772 cfm. f-series compressors are available in both packaged and non-packaged options – custom designed to meet the user’s specific needs – available from single stage up to four stages, offering flow rates up to 118,000 SCFM. Both series offer 100% oil-free air, a highly efficient design to reduce energy usage, and horizontal split design gearbox allowing easy access to all moving parts, simplifying maintenance.

Centrifugal compressors are heavily used in steel mills, petrochemical, chemical, oil and gas, air separation and automotive industries, among others. Sullair centrifugal compressors are an addition to an already extensive line of portable and stationary rotary screw air compressors, compressed air treatment equipment and rotary screw components for OEMs. Globally, IHI and IHI-Sullair have produced more than 10,000 centrifugal compressors. IHI has been supplying centrifugal compressors since 1970.

Sullair will be featuring its centrifugal compressors at the Pump Turbo Symposium, Sept. 15-17, 2015 in Houston, Texas. Visit Sullair in booth #1413 to learn more.

About Sullair:

Since 1965, Sullair has developed and manufactured air compressors with proven reliability and wear-free durability. Sullair is globally recognized as a leading manufacturer of portable air compressors, contractors’ air tools, stationary air compressors, compressed air treatment equipment and vacuum systems. Additionally, Sullair provides customers with a full line of aftermarket parts, fluids and services. Celebrating its 50th anniversary in 2015, Sullair has manufacturing capabilities in Michigan City, Indiana; Shenzhen and Suzhou, China; Mahindra World City, India; as well as a JV (IHI-Sullair) based in Suzhou. For more information, visit www.sullair.com.

About Accudyne:

Accudyne Industries is the parent company of Sullair, and a global provider of precision-engineered, process-critical and technologically advanced flow control systems and industrial compressors that deliver consistently high performance and give confidence to the mission of its customers in the most important industries and harshest environments around the world. Today, Accudyne is powered by ~3,000 employees at 15 manufacturing facilities, supporting a broad range of industries in more than 150 countries. For more information, visit www.accudyneindustries.com.
