Sullair Showcases Full Suite of Lubricants at SEMA Show

Chicago – Nov. 3, 2015 – Sullair, an industry leader in innovative compressed air solutions since 1965, today relaunched its full suite of lubricants for portable and stationary compressors at the 2015 SEMA Show.

“Lubricants are the lifeblood of our compressors,” said Rebecca O’Mara, business leader, after sales and support, at Sullair. “Our portable and stationary lubricants play a vital role in maximizing compressor performance, improving economics and extending service life — all important aspects in the automotive specialty sector, where compressed air is used in nearly every application. Our recently expanded team of aftermarket specialists are ready to serve our distributors.”

Sullair stationary compressor lubricants are engineered to minimize maintenance and extend the life of your air compressor systems. Stationary fluids include Sullube®, 24KT®, Pristine FG™, SRF 1/4000® and SRF II/8000®. Sullube, an extended-life synthetic powered by The Dow Chemical Company, offers 10,000 hours of premium performance – among the longest in the industry – and is used in more than 50,000 compressors worldwide. 24KT is a silicon-based, semi-organic fluid that lasts indefinitely with minimal maintenance. Pristine FG is a synthetic lubricant complying with food-grade standards. SRF 1/4000 is a highly refined, semi-synthetic paraffinic oil lasting up to 4,000 hours, while SRF II/8000 lasts up to 8,000 hours.

Sullair portable compressor lubricants are formulated to perform in extreme conditions, helping every unit produce reliable air, no matter where. Portable fluids include HPL 1500 and AWF®. Lasting up to 1,500 hours, HPL 1500 is a multi-viscosity, highly refined, synthetic hydrocarbon fluid that protects high pressure compressors (350 psi and above) in demanding applications. Also lasting up to 1,500 hours, AWF is a multi-viscosity, highly refined, petroleum-based fluid which not only helps with cold-weather startups, but is also designed for the most extreme conditions.

Sullair will feature its lubricants, as well as stationary compressors and air treatment products, including filters and dryers, at the SEMA Show, Nov. 3-6, 2015 in Las Vegas. Visit Sullair in booth #15225 to learn more.

About Sullair:

Since 1965, Sullair has developed and manufactured air compressors with proven reliability and wear-free durability. Sullair is globally recognized as a leading manufacturer of portable air compressors, contractors’ air tools, stationary air compressors, compressed air treatment equipment and vacuum systems. Additionally, Sullair provides customers with a full line of aftermarket parts, fluids and services.

Celebrating its 50th anniversary in 2015, Sullair has manufacturing capabilities in Michigan City, Indiana; Shenzhen and Suzhou, China; Mahindra World City, India; as well as a JV (IHI-Sullair) based in Suzhou. For more information, visit www.sullair.com.

About Accudyne:

Accudyne Industries is the parent company of Sullair, and a global provider of precision-engineered, process-critical and technologically advanced flow control systems and industrial compressors that deliver consistently high performance and give confidence to the mission of its customers in the most important industries and harshest environments around the world. Today, Accudyne is powered by ~3,000 employees at 15 manufacturing facilities, supporting a broad range of industries in more than 150 countries. For more information, visit www.accudyneindustries.com.
