Sullair Unveils New 1600H Tier 4 Final Air Compressor

CHICAGO – March 7, 2017 – Sullair, an industry leader in innovative compressed air solutions since 1965, today unveiled its new 1600H Tier 4 Final portable air compressor at CONEXPO/CON-AGG 2017. The new compressor, powered by the legendary Sullair 25 Series air end and a reliable Caterpillar C15 engine, offers versatile operation, rated at 1600 cfm at 100/150 psi.

Compared to previous models, the completely redesigned Tier 4 Final Emissions Compliant 1600H is 20 percent smaller and 2,500 pounds lighter for easier maneuverability, storage, handling and transit. The unit also offers improved fuel efficiency—approximately 20 percent lower part load fuel consumption and 10 percent overall fuel consumption—with up to 10 hours of uninterrupted run time; a minimum of 2:1 fuel tank fill to diesel exhaust fluid tank fill; and quick-connections and easy-operation valve for an external diesel fuel supply.

“We carefully analyzed every detail of the new 1600H to ensure it provides users with the hardest working, most efficient and user-friendly design possible,” said Justin Tuchscherer, Senior Product Manager, Rental & Infrastructure at Sullair. “This unit is a game changer for Sullair portable offerings.”

One of the more significant new features on the unit is the seven-inch touch screen controller—the first of its kind to be incorporated into a Sullair compressor. The durable controller can stand up to the harshest environments, while providing easily accessible, in-depth compressor and engine information.

The 1600H is also one of the first models to display the company’s new brand look. All new Sullair units will feature “The Sullair Power Stripe,” which represents a recommitment to three things: reliability, durability and performance.

The new model incorporates many additional customer-driven improvements, including being highway towable running gear rated at 65 mph, sized to easily fit two units on a standard flatbed or drop-deck over-the-road trailer, and incorporating fork lift pockets standard on all models. For improved serviceability, it also offers a 1,500-hour air-oil separator design with lower lubricant requirements and an extended 500-hour engine oil service level.

Visit Bronze Lot B7801 at CONEXPO/CON-AGG 2017 to learn more about the 1600H and additional Sullair offerings.

About Sullair

Since 1965, Sullair has developed and manufactured air compressors with proven reliability and wear-free durability. Sullair is globally recognized as a leading manufacturer of portable air compressors, contractors' air tools, stationary air compressors, compressed air treatment equipment and vacuum systems. Additionally, Sullair provides customers with a full line of aftermarket parts, fluids and services. Sullair has manufacturing capabilities in Michigan City, Indiana; Shenzhen and Suzhou, China; Mahindra World City, India; as well as a JV (IHI-Sullair) based in Suzhou. For more information, visit www.sullair.com.

About Accudyne

Accudyne Industries is the parent company of Sullair, and a global provider of precision-engineered, process-critical and technologically advanced flow control systems and industrial compressors that deliver consistently high performance and give confidence to the mission of its customers in the most important industries and harshest environments around the world. Today, Accudyne is powered by ~2,700 employees with 14 manufacturing facilities, supporting a broad range of industries in more than 150 countries. For more information, visit www.accudyneindustries.com.
