Sullair 400HH Tier 4 Final Earns 2016 RER Innovative Product Award

CHICAGO – January 9, 2017 – Sullair, an industry leader in innovative compressed air solutions since 1965, announced its 400HH Tier 4 Final portable rotary screw air compressor has earned the 2016 Rental Equipment Register (RER) Innovative Product Award in the Compressors/Air Tools category.

The 400HH – part of the 375 Tier 4 Final family – is a new high-powered and versatile offering from Sullair that maximizes engine power into pressure and air flow volume. The engine-mounted after-treatment allows Sullair to package the engine into a 25 percent smaller footprint, helping with towing and jobsite maneuverability. It also has swing doors on all four sides providing unprecedented service access. The 400HH is powered by a CAT C4.4 Tier 4 Final emissions compliant engine and boasts 400 cfm and 200 psi.

The RER Innovative Product Awards honor excellence in new product development in the equipment rental industry. The prestigious awards showcase the most innovative products introduced between August 1, 2015, and July 31, 2016. Entries were judged in their category based on innovation, product design, safety, fulfillment of a need in the rental market and influence on the industry.
