Sullair Features Upgraded Portable Air Compressors, Expanded Remanufacturing Program & New Reconditioning Program at The ARA Rental Show 2016

CHICAGO – Feb. 22, 2016 – Sullair, an industry leader in innovative compressed air solutions since 1965, is showcasing several new products and services at The ARA Rental Show in Atlanta February 21-24, 2016. Highlights at Sullair Booth #3875 include the following:

- Introduction of the upgraded 185 Tier 4 Final and 375 Tier 4 Final portable air compressors
- Details on the expansion of the Sullair Certified REMAN program
- Launch of the brand new Sullair Certified RECON program
- Announcement of a multimillion-dollar equipment investment in Michigan City facility

Upgraded Tier 4 Final Models

The updated Sullair 185 T4F, in full production and ready to order, and the Sullair 375 T4F, available for preorder, are on display at the show. The reimagined models offer the durability for which Sullair is known, but in a more compact, efficient and user-friendly design that meets the latest government regulations.

Expanded REMAN Program

Sullair has expanded the number of models included in its Certified REMAN program for portable air compressors. In addition to the current four models, the program will now include the 375HH, 375HHAF, and the open frame 900XHH/1150XHDL portable air compressors. The new offerings will cater to customers using compressors for high-pressure applications (200 – 500 psi), including mining, drilling, pipelining, and more.

New RECON Program

Sullair has launched its brand new Certified RECON program for large portable air compressors. Under the reconditioning program, customers can turn in their used compressor—models 750 cfm through 1600 cfm built between 2004 and 2012—and within 6-to-8 weeks, Sullair will refurbish it to whatever specification is requested.

Michigan City Investment

The company has announced a multimillion-dollar investment to purchase seven state-of-the-art machines for use in its rotor shop located in Michigan City, Indiana. The new machines will allow for better manufacturing efficiency, and even higher-quality parts, while increasing operator safety.

“We look forward to The Rental Show every year,” said Rebecca O’Mara, business leader, after sales and support, for Sullair. “Not only does it allow us to really connect with our customers and gain valuable insight into their needs, but it also serves as a platform for us to introduce the latest innovations, products and services.”

At The Rental Show, visit Sullair in Booth #3875 to learn more about the latest innovations from the company. To learn more about Sullair and its products, visit www.sullair.com.

About Sullair

Since 1965, Sullair has developed and manufactured air compressors with proven reliability and wear-free durability. Sullair is globally recognized as a leading manufacturer of portable air compressors, contractors’ air tools, stationary air compressors, compressed air treatment equipment and vacuum systems. Additionally, Sullair provides customers with a full line of aftermarket parts, fluids and services. Sullair has manufacturing capabilities in Michigan City, Indiana; Shenzhen and Suzhou, China; Mahindra World City, India; as well as a JV (IHI-Sullair) based in Suzhou. For more information, visit www.sullair.com.

About Accudyne

Accudyne Industries is the parent company of Sullair, and a global provider of precision-engineered, process-critical and technologically advanced flow control systems and industrial compressors that deliver consistently high performance and give confidence to the mission of its customers in the most important industries and harshest environments around the world. Today, Accudyne is powered by ~3,000 employees at 15 manufacturing facilities, supporting a broad range of industries in more than 150 countries. For more information, visit www.accudyneindustries.com.
