## **Sullair Launches New Certified RECON Program**

**CHICAGO – Feb. 22, 2016** – Sullair, an industry leader in innovative compressed air solutions since 1965, today announced the launch of its brand new Certified RECON program for its large portable air compressors. Under the reconditioning program, customers can turn in their used compressor—750 to 1600 cfm models from 2004-2012—and within 6-to-8 weeks, Sullair will refurbish it to whatever specification is requested.

The RECON program will offer companies a hassle-free way to maintain their equipment and keep it running at maximum efficiency. Over the past year, Sullair has successfully been testing the program with a pilot company.

The RECON program allows customers to send in their machine to Sullair and specify exactly what work they'd like done. The customer then receives the same machine back in 6-to-8 weeks with warranties on only what has been replaced. This differs from the Certified REMAN program, where the customer receives a like-new machine with a like-new warranty. The customer sends in their old core and receives a machine that has been fully remanufactured to the latest factory revisions with no waiting time.

"This program was truly designed with the end user in mind," said Rebecca O'Mara, business leader, after sales and support for Sullair. "Not only does it provide cost savings over time, but it also allows the customer to customize the compressors to meet their unique requirements."

The addition of the Sullair Certified RECON program now allows Sullair customers to meet their compressor needs through four different avenues: purchasing a remanufactured model; reconditioning their current fleet; and renting or buying brand new from a Sullair distributor.

To learn more about the Sullair Certified RECON program, visit [www.sullair.com](http://www.sullair.com) or contact your local Sullair distributor.

### **About Sullair**

Since 1965, Sullair has developed and manufactured air compressors with proven reliability and wear-free durability. Sullair is globally recognized as a leading manufacturer of portable air compressors, contractors' air tools, stationary air compressors, compressed air treatment equipment and vacuum systems. Additionally, Sullair provides customers with a full line of aftermarket parts, fluids and services. Sullair has manufacturing capabilities in Michigan City, Indiana; Shenzhen and Suzhou, China; Mahindra World City, India; as well as a JV (IHI-Sullair) based in Suzhou. For more information, visit [www.sullair.com](http://www.sullair.com).

### **About Accudyne**

Accudyne Industries is the parent company of Sullair, and a global provider of precision-engineered, process-critical and technologically advanced flow control systems and industrial compressors that deliver consistently high performance and give confidence to the mission of its customers in the most important industries and harshest environments around the world. Today, Accudyne is powered by ~3,000 employees at 15 manufacturing facilities, supporting a broad range of industries in more than 150 countries. For more information, visit [www.accudyneindustries.com](http://www.accudyneindustries.com).
